

## Making a new treasure hunting program for Enoshima

- Now treasure hunting program is mainly for children
- I'd like to propose a new treasure hunting program associated with historical things and geological things.
- It would be pleasant for tourists that are interesting in history and geology.

The two mountains  
Between mountains  
Tourists can see the ocean.

This landscape was made when a cave that had been invaded by ocean was collapsed. Ocean had invaded in accordance with the geological fault.

There is a Ryujin legend associated Iwaya cave. The story is that Ryujin falling love a girl was pursaded out of making disaster by her and married her. The girl got to be associated with Benzaiten religion. Finally Iwaya cave get to be part of Enoshima shrine.

Geological fault

Shoutenjima

**1 .** In the two mountains observation deck tourists know about how this landscape was made and look for the geological fault and got a key and a instruction note

**2 .** Lead by the instruction go to Iwaya cave and know about the girl regarded as Benzaiten. Instruction tells to Search Benzaiten. And get a key

**3 .** Go to Enoshima shrine and know about benzaiten religion . Instruction tell to go to kodama shrine.and get a key and instruction note

**4 .** Hint is" go straight ,turn right and find Tennyo".And tourists find Shoutenjima and know about story of tennnyo and uplift of shoutenjima. Finally tourist learn about Enoshima's history that nature and religion have woven.

exchange 3keys fo ra souvenir.
